AX Series Modular Teller Lockers

Advanced design, rugged construction, improved security.

The AX series modular teller lockers come in 6 different configurations, and offer a modular design and size to allow mix and match combinations to more precisely fit the need.

Three elevations, 11 1/8", 22 1/4" and 33 3/8" allow the best space utilization while providing the desired number and size of openings.

The Bridgeman AX series of lockers combines 1/2" solid aluminum doors faced with stainless steel with cabinets of powder coated rust-resistant steel.

For high security, the doors are designed with a heavy flange which interlocks with the door jamb. All lockers are equipped with U.L. listed double key changeable key locks. Combination locks or electronic combination locks are available as an optional extra.
