- Dual "lighted" customer controls and corner carrier presentation for ease of customer use

DRIVE UP SOLUTIONS

3100RT

PNEUMATIC SYSTEMS

Your customer is sitting in your drive-up lane for 90 seconds. Why not take advantage of that time to tell them what is special about your services! The optional 3100-RT video is a remote customer service representative that can deliver your message time after time. The 3100-RT is designed around customer features that help differentiate in today's competitive market.

CUSTOMER FRIENDLY

- Optional two-way video with 10.4" color monitor provides exceptional advertising platform and enhanced customer communication.
- Motorized camera can be raised and lowered by teller for positive customer identification in varying size vehicles.
- Large "lighted" color customer controls provide exceptional visibility for ease of customer use.
- Dual "lighted" customer controls permit maximum ease of customer use from subcompact to commercial size vehicles.
- Optional traffic sensor announces customer arrival and helps streamline transaction time.
- State-of-art audio/video components deliver the highest quality sound clarity available in the industry.

ENGINEERED FOR EFFICIENCY & RELIABILITY

- High-tech cabinet styling combined with a stainless steel and high impact enamel finish retains like new appearance for years of operation.
- Removable side and front panels provide complete access to service points and eliminates obstruction of additional lanes for service.
- Powered by high performance "POWERMAX -2" a two turbine system for fast transaction time.
- Integrated "soft landing" features extend carrier life, reduce system wear and provides years of reliable operation.
